

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A method for sharing a virtual folder item in a computer system between a sharer and a sharee, comprising:
the sharer selecting a virtual folder item to be shared;
the sharer selecting at least one sharee with whom the virtual folder item is to be shared;
storing information, corresponding to the item to be shared and corresponding to the sharee, on the sharer's computer; and
providing to the sharee direct access to the virtual folder item on the sharer's computer.
2. (Original) The method of claim 1, wherein the sharer also designates a level of permission that is assigned to the sharee.
3. (Previously Presented) The method of claim 1, further comprising verifying that a file share exists from which the virtual folder item to be shared can be accessed remotely.
4. (Previously Presented) The method of claim 3, wherein if a file share already exists, the permissions on the file share are set so as to allow the sharee to access the virtual folder item that is to be shared.
5. (Previously Presented) The method of claim 1, further comprising verifying that any permissions associated with the virtual folder item that is to be shared are set so that the sharee can access the item.
6. (Previously Presented) The method of claim 1, further comprising determining whether the virtual folder item is protected, and if so verifying that the item can be shared with the sharee, and if the item cannot be shared, providing a notification to the sharer.

7. (Previously Presented) The method of claim 1, further comprising verifying that the sharer's firewall will allow the sharee to access the shared virtual folder item.

8. (Original) The method of claim 1, further comprising recording one or more details of the sharing transaction, including at least one of what was shared, who it was shared with, or when it was shared.

9. (Currently Amended) The method of claim 1, further comprising sending a link to the sharee in response to the sharer selecting the virtual folder item and the at least one sharee, the link allowing ~~that allows~~ the sharee to access the shared virtual folder item directly from the sharer's computer.

the sharer selecting a virtual folder item to be shared;

the sharer selecting at least one sharee with whom the virtual folder item is to be shared;

10. (Original) The method of claim 1, further comprising allowing the sharee to query the sharer's computer to see what the sharer has shared out with the sharee.

11. (Previously Presented) The method of claim 1, wherein the virtual folder item is an individual item that is shared directly, independent of a share status of a folder in which the item is saved.

12-18. (Cancelled)

19. (Previously Presented) One or more computer-readable media for enabling a computer-program segment to communicate with one or more other computer-program segments for sharing a virtual folder item, said media comprising:

a set of computer-usable instructions that cause a request to provide access to a virtual folder item that is to be shared to be communicated from the sharee's computer directly to one or

more other computer-program segments in the sharer's computer capable of executing said request.

20. (Previously Presented) The media of claim 19, further comprising computer-usable instructions to verify that any permissions associated with the virtual folder item are set so that the item can be accessed.

21. (Previously Presented) The media of claim 19, further comprising computer-usable instructions for determining whether the virtual folder item is protected, and if so, verifying that the item can be shared, and if the item cannot be shared, providing a notification.

22. (Original) The media of claim 19, further comprising computer-usable instructions for recording one or more details of the sharing transaction, including at least one of what was shared, who it was shared with, or when it was shared.

23. (Currently Amended) The media of claim 19, further comprising computer-usable instructions for sending a link that provides direct access to the virtual folder item, the link sent in response to the request to provide access to a virtual folder item.

24. (Previously Presented) A method of sharing a virtual folder item between a sharer and a sharee, comprising:

receiving a call issued by the sharer for setting at least one permission which will allow the sharee to directly access the virtual folder item at the sharer's computer; and
in response to the call, setting the permission for the item.

25. (Previously Presented) The method of claim 24, further comprising verifying that any permissions associated with the virtual folder item are set so that the sharee can access the virtual folder item.

26. (Previously Presented) The method of claim 24, further comprising determining whether the virtual folder item is protected, and if so, verifying that the virtual folder item can be shared with the sharee.

27. (Previously Presented) The method of claim 24, wherein when access may be unavailable to a virtual folder item, a notification is provided to the sharer.

28. (Previously Presented) The method of claim 24, wherein the sharer is able to limit the type of access that is provided to the virtual folder item.

29. (Original) The method of claim 24, further comprising recording one or more details of the sharing transaction.

30. (Currently Amended) The method of claim 24, further comprising sending a link to the sharee in response to the call issued by the sharer, the link allowing ~~that allows~~ the sharee to access the virtual folder item directly from the sharer's computer.

31. (Original) The method of claim 24, further comprising allowing the sharee to query the sharer's computer to see what the sharer has shared out with the sharee.

32. (Previously Presented) The method of claim 24, wherein the item that is shared is an individual item which is shared directly, independent of a share status of a folder in which the item is saved.

33. (Previously Presented) One or more computer-readable media for enabling a sharer to share a virtual folder item with a sharee, comprising:

a set of computer-usable instructions that allow the sharee to directly access the virtual folder item through the sharer's computer, independent of a share status of a physical folder in which the virtual folder item is stored on the sharer's computer.

34. (Original) The media of claim 33, wherein the sharer designates a level of permission that is assigned to the sharee, and additional sharees may receive different permissions.

35. (Original) The media of claim 33, wherein the sharer designates a permission for the item, and additional items may be assigned different permissions.

36. (Original) The media of claim 33, further comprising computer-usable instructions for determining whether the item is protected, and if so, verifying that the item can be shared with the sharee, and if the item cannot be shared, providing a notification to the sharer.

37. (Original) The media of claim 33, wherein when access may be unavailable to an item, a notification is provided to the sharer.

38. (Original) The media of claim 33, further comprising computer-usable instructions for recording one or more details of the sharing transaction.

39. (Currently Amended) The media of claim 33, further comprising computer-usable instructions for sending a link to the sharee in response to the sharer sharing the virtual folder item with the sharee, the link allowing that allows the sharee to access the shared item directly from the sharer's computer.

40. (Original) The media of claim 33, further comprising computer-usable instructions for allowing the sharee to query the sharer's computer to determine what the sharer has shared out with the sharee.

41. (Cancelled)

42. (Previously Presented) A method for sharing an individual virtual folder item in a computer system between a sharer and a sharee, comprising:

designating an individual virtual folder item on a sharer's computer to be shared independent of a share status of a folder in which the item is saved; and

sharing the individual item with a sharee such that the sharee is provided with direct access to the individual item from the sharer's computer.

43. (Original) The method of claim 42, wherein the sharer designates a level of permission for the sharee, and additional sharees may receive different levels of permission.

44. (Original) The method of claim 42, further comprising verifying that any permissions associated with the item are set so that the sharee can access the item.

45. (Original) The method of claim 42, further comprising determining whether the item is protected, and if so, verifying that the item can be shared.

46. (Original) The method of claim 42, wherein when access is unavailable to an item, a notification is provided to the sharer.

47. (Original) The method of claim 42, further comprising recording one or more details of the sharing transaction.

48. (Currently Amended) The method of claim 42, further comprising sending a link to the sharee in response to the sharer sharing the individual item with a sharee, the link allowing ~~that allows~~ the sharee to access the item directly from the sharer's computer.

49. (Previously Presented) The method of claim 1, wherein the providing step comprises providing the sharee remote access to the item on the sharer's computer.

50. (Cancelled)

51. (Previously Presented) The one or more computer readable media of claim 19, wherein the set of computer-usable instructions cause the request to provide remote access to the at least one item.

52. (Previously Presented) The method of claim 24, wherein the permission further allows the sharee to remotely access the item at the sharer's computer.

53. (Previously Presented) The one or more computer-readable media of claim 33, wherein the set of computer-usable instructions allow the sharee to remotely access the item through the sharer's computer.

54. (Previously Presented) The method of claim 42, wherein in the sharing step the sharee is provided with remote access to the individual item from the sharer's computer.

55. (Previously Presented) The method of claim 1, wherein the item comprises a file item.

56. (Previously Presented) The method of claim 1, wherein the item comprises a non-folder non-file item.

57-58. (Cancelled)

59. (Previously Presented) The one or more computer-readable media of claim 19, wherein the item comprises a file item.

60. (Previously Presented) The one or more computer-readable media of claim 19, wherein the item comprises a non-folder non-file item.

61. (Previously Presented) The method of claim 24, wherein the item comprises a file item.

62. (Previously Presented) The method of claim 24, wherein the item comprises a non-folder non-file item.

63. (Previously Presented) The one or more computer-readable media of claim 33, wherein the item comprises a file item.

64. (Previously Presented) The one or more computer-readable media of claim 33, wherein the item comprises a non-folder non-file item.

65. (Previously Presented) The method of claim 42, wherein the item comprises a file item.

66. (Previously Presented) The method of claim 42, wherein the item comprises a non-folder non-file item.

67. (Previously Presented) A computer readable medium storing computer executable instructions for performing a method for sharing an item in a computer system between a sharer and a sharee, comprising steps of:

- a) receiving input from the sharer identifying a first item to be shared;
- b) receiving input from the sharer identifying at least one sharee with whom the first item is to be shared;
- c) receiving a request directly from the sharee for access to the item on the sharer's computer;
- d) responsive to step c), providing direct access to the sharee to the item on the sharer's computer; and

e) prohibiting access by the sharee to a second item stored in a same folder on the sharer's computer as the shared item, based on a non-shared status of the second item.

68. (Previously Presented) The computer readable medium of claim 67, wherein step e) comprises hiding the second item from the sharee.

69. (Previously Presented) A computer readable medium storing one or more data structures representing a hierarchy of items stored in a file system, comprising:

a first data field on the sharer's computer identifying a shared status of a first file item stored in a folder; and

a second data field on the sharer's computer identifying a shared status of a second file item stored in the folder,

wherein the first data field indicates that the first file item is shared by a sharer user with a sharee user, and wherein the second data field indicates that the second file item is not shared by the sharer user with the sharee user.

70. (Previously Presented) The method of claim 1, further comprising determining whether the item is protected and, if so, verifying that the item can be shared with the sharee, and if the item can be shared, determining whether to remove the protection from the item prior to sharing the item with the sharee.

71. (Cancelled)

72. (Previously Presented) The computer readable medium of claim 33, wherein the instructions further comprise determining whether the item is protected and, if so, verifying that the item can be shared with the sharee, and if the item can be shared, determining whether to remove the protection from the item prior to sharing the item with the sharee.

73. (Previously Presented) The method of claim 42, further comprising determining whether the item is protected and, if so, verifying that the item can be shared with the sharee, and if the item can be shared, determining whether to remove the protection from the item prior to sharing the item with the sharee.

74-78. (Cancelled)
